

RNA

A PUBLICATION OF THE RNA SOCIETY

VOL. 14, NO. 5

MAY 2008

CONTENTS

Review

- Modulating the activity of the peptidyl transferase center of the ribosome 795
Malte Beringer
- Splicing regulation: From a parts list of regulatory elements to an integrated splicing code 802
Zefeng Wang and Christopher B. Burge

Bioinformatics

- Dual coding of siRNAs and miRNAs by plant transposable elements 814
Jittima Piriyaongsa and I. King Jordan

Reports

- The aptamer core of SAM-IV riboswitches mimics the ligand-binding site of SAM-I riboswitches 822^{OA}
Zasha Weinberg, Elizabeth E. Regulski, Ming C. Hammond, Jeffrey E. Barrick, Zizhen Yao, Walter L. Ruzzo, and Ronald R. Breaker
- Two molecular features contribute to the Argonaute specificity for the microRNA and RNAi pathways in *C. elegans* 829
Guillaume Jannot, Marie-Eve L. Boisvert, Isabelle H. Banville, and Martin J. Simard
- Microarray-based analysis of stress-regulated microRNAs in *Arabidopsis thaliana* 836
Han-Hua Liu, Xin Tian, Yan-Jie Li, Chang-Ai Wu, and Cheng-Chao Zheng

Articles

- Normalization of microRNA expression levels in quantitative RT-PCR assays: Identification of suitable reference RNA targets in normal and cancerous human solid tissues 844
Heidi J. Peltier and Gary J. Latham
- Experimental validation of the importance of seed complement frequency to siRNA specificity 853^{OA}
Emily M. Anderson, Amanda Birmingham, Scott Baskerville, Angela Reynolds, Elena Maksimova, Devin Leake, Yuriy Fedorov, Jon Karpilow, and Anastasia Khvorova

(continued)

Cover Illustration: 60-kDa Ro autoantigen in complex with a fragment of misfolded RNA (Protein Data Bank code: 2i91; Nucleic Acid Database code: pr0232; Fuchs, G., Stein, A.J., Fu, C., Reinisch, K.M., and Wolin, S.L. 2006. Structural and biochemical basis for misfolded RNA recognition by the Ro autoantigen. *Nat. Struct. Mol. Biol.* **13**: 1002–1009). Image details: RNA: solid surface, green; protein: ribbon representation, violet. The image was generated with the Accelrys Discovery Studio Visualizer. Cover image provided by the Jena Library of Biological Macromolecules—JenaLib (www.fli-leibniz.de/IMAGE.html).

Lack of secondary structure characterizes the 5' ends of mammalian mitochondrial mRNAs <i>Christie N. Jones, Kevin A. Wilkinson, Kimberly T. Hung, Kevin M. Weeks, and Linda L. Spremulli</i>	862 ^{OA}
miR-148 targets human DNMT3b protein coding region <i>Anja M. Duursma, Martijn Kedde, Mariette Schrier, Carlos le Sage, and Reuven Agami</i>	872
Sm protein methylation is dispensable for snRNP assembly in <i>Drosophila melanogaster</i> <i>Graydon B. Gonsalvez, Kavita Praveen, Amanda J. Hicks, Liping Tian, and A. Gregory Matera</i>	878
Identification of TTP mRNA targets in human dendritic cells reveals TTP as a critical regulator of dendritic cell maturation <i>Jillian Emmons, W.H. Davin Townley-Tilson, Kristen M. Deleault, Stephen J. Skinner, Robert H. Gross, Michael L. Whitfield, and Seth A. Brooks</i>	888
Hairpin RNAs derived from RNA polymerase II and polymerase III promoter-directed transgenes are processed differently in plants <i>Ming-Bo Wang, Christopher A. Helliwell, Li-Min Wu, Peter M. Waterhouse, W. James Peacock, and Elizabeth S. Dennis</i>	903
Unexpected roles for UPF1 in HIV-1 RNA metabolism and translation <i>Lara Ajamian, Levon Abrahamyan, Miroslav Milev, Pavel V. Ivanov, Andreas E. Kulozik, Niels H. Gehring, and Andrew J. Mouland</i>	914
Maturation of the 5S rRNA 5' end is catalyzed in vitro by the endonuclease tRNase Z in the archaeon <i>H. volcanii</i> <i>Annette Hölzle, Susan Fischer, Ruth Heyer, Stefanie Schütz, Martin Zacharias, Paul Walther, Thorsten Allers, and Anita Marchfelder</i>	928
An important role of G638 in the <i>cis</i> -cleavage reaction of the <i>Neurospora VS</i> ribozyme revealed by a novel nucleotide analog incorporation method <i>Dominic Jaikaran, M. Duane Smith, Reza Mehdizadeh, Joan Olive, and Richard A. Collins</i>	938
The AU-rich element mRNA decay-promoting activity of BRF1 is regulated by mitogen-activated protein kinase-activated protein kinase 2 <i>Sushmit Maitra, Chu-Fang Chou, Christian A. Luber, Kyung-Yeol Lee, Matthias Mann, and Ching-Yi Chen</i>	950
Cap-dependent eukaryotic initiation factor-mRNA interactions probed by cross-linking <i>Lisa Lindqvist, Hiroaki Imataka, and Jerry Pelletier</i>	960
TbRGG1, an essential protein involved in kinetoplastid RNA metabolism that is associated with a novel multiprotein complex <i>Hassan Hashimi, Alena Zíková, Aswini K. Panigrahi, Kenneth D. Stuart, and Julius Lukeš</i>	970
Method Selection of peptides interfering with a ribosomal frameshift in the human immunodeficiency virus type 1 <i>Dominic Dulude, Gabriel Théberge-Julien, Léa Brakier-Gingras, and Nikolaus Heveker</i>	981
RNA: Instructions for contributors	992

Announcement: Changes in publication charges and Open Access charges for members of the RNA Society

As most of our readers are aware, the *RNA* journal is the official publication of the RNA Society. The ongoing partnership between Cold Spring Harbor Laboratory Press and the Society has resulted in making *RNA* a respected and successful international forum for publishing original reports on RNA research in the broadest sense. We are pleased to announce that this success has enabled the Society to substantially reduce the costs associated with publishing in *RNA* for members.

Beginning with papers published in 2008, members of the RNA Society will receive a 50% discount on page charges (\$25 instead of \$50) as well as a 50% discount on the first color figure (\$225 instead of \$450). For those members who wish to have their work immediately accessible to the entire community (Open Access), the charge will be \$1500 (a \$500 savings from the non-member fee). We note that these member savings more than offset the cost of a one-year membership in the Society, which includes a subscription to *RNA* (\$160 for print and online, \$140 for online only). In addition to the benefits in publication costs, members also receive:

- Reduced registration fees for the annual meeting of the Society (more than \$100 savings)
- The RNA Society Newsletter, a forum for disseminating information to members and discussing issues affecting the Society and RNA Science
- Numerous opportunities for students and post-docs to become involved in the Society
- The Directory of Members, available on the Web and in print
- Free job postings on the Society Employment and Careers Web site
- Opportunities to request Travel Fellowship and Meeting Support for RNA-related meetings you are organizing.

If you wish to take advantage of these benefits or are considering publishing in *RNA*, take a moment to start or renew your membership for 2008 (<http://rnasociety.org/membership>). The RNA Society is an interdisciplinary, cohesive intellectual home for those interested in all aspects of RNA Science. We welcome new members from all areas of scientific research and we look forward to sharing the new perspectives they bring to the Society.

In addition to reducing publication costs for members of the RNA Society, beginning in 2008 *RNA* will start to accept Supplementary Material which will be linked to the article published online. Such Supplementary Material will be restricted to long tables of data, lists of genomic and sequence data, or videos. Submitted Supplementary Material such as gels or other simple figures as well as standard tables will not be linked to online articles and must be maintained on the author's Web site. In this regard, Supplementary Material is not intended for completing a manuscript with standard figures or tables. Appropriate Supplementary Material, as discussed above, will be peer-reviewed and must be submitted online at the same time as the manuscript. It cannot be altered after acceptance of the manuscript. Submission of Supplementary Material to the journal is not an alternative to submission to public databases (thus crystal structure coordinates, sequence data, microarray data must be submitted prior to submission to the journal and accession numbers given in the manuscript). Public databases have confidential sections to which passwords give access for editors and referees on request. The context of the files contained in the Supplementary Material should be precisely described at the end of the Material and Methods section in the manuscript and referred to at the appropriate places in the text. The types of files supplied should be clearly indicated (.doc, .xls, .rtf, .mp3, .mpeg, .mov, .wav, ...).

In sum, we believe the changes outlined above will facilitate continued growth of the journal and we thank all authors and reviewers for making *RNA* what it is today.

Evelyn Jabri, CEO, RNA Society
Timothy W. Nilsen, Editor in Chief
